Medical Device Extraction Research Associate

Toxikon Corporation, originally founded in 1977, is a Contract Research and testing company with laboratories in Bedford, MA and Belgium. Our mission continues to focus on providing quality pre-clinical services, competitively priced, with on-time delivery for the Pharmaceutical, Medical Device and Biotech industries.

Toxikon is seeking a team oriented and quality first Research Associate to work in the Medical Device Extraction lab. The successful candidate will work hand in hand with our Study Directors, other Research Associates and interface with clients and Client Relations to create the extractions that are subsequently used in In-Vitro and In-Vivo Biocompatibility testing programs. Candidates will be selected based on experience, aptitude and a dynamic personality.

Requested Experience

- Medical device extracts are performed on surface area per volume ratios, strong math skills is required.
- This is an entry level position in the lab, but prior non-academic work experience is required.
- Must have strong computer skills.
- Operate, calibrate and maintain equipment used in the lab.
- Ability to independently solve both technical and theoretical problems and deal with a variety of variables related to the lab and the scientific conduct of studies the lab supports.
- Maintain conformance to SOPs and with GLP, ISO and FDA standards.
- Good interpersonal skills, proficiency with computers, organization and time management skills are required. Motivated worker with willingness to learn additional skills and complete tasks independently is a plus.

Minimum Qualifications

- Bachelor’s degree in a scientific area (Biology, Chemistry, etc.)
- Associates degree may be considered based on prior knowledge/work experience.

This position is located in Bedford, MA.
