

ADVANCING YOUR INNOVATION

## **Microbiology Technician**

Toxikon Corporation, originally founded in 1977, is a Contract Research and testing company with laboratories in Bedford, MA and Belgium. Our mission continues to focus on providing quality services, competitively priced, with on-time delivery for the Pharmaceutical, Medical Device and Biotech industries.

We are seeking entry level candidates for positions within our Microbiology department in a growing medical device, pharmaceutical, and biotechnology-testing laboratory. Candidates will be trained in the performance of special studies and routine microbiological analysis; Biological Indicator, Environmental Monitoring, USP Purified Water, Microbial Identification, Sterility Testing, Bacterial Endotoxin, & Medical Device Bio Burden Testing.

Candidates should have a Sciences Certification or B.S., Microbiology, Biology, or related field of study, and possess at least 1 year experience in microbiology and/or cell culture technique and assay. Preference will be given to candidates with GMP/GLP background. The right candidates should possess excellent communication skills, ability to follow and document procedure, and problem solve. High motivation, dedication, effective time management, and ability to cooperatively work within a team also required.
