Research Associate II, Bioanalytical

Toxikon Corporation, originally founded in 1977, is a Contract Research and testing company with laboratories in Bedford, MA and Belgium. Our mission continues to focus on providing quality pre-clinical services, competitively priced, with on-time delivery for the Pharmaceutical, Medical Device and Biotech industries.

Toxikon Corporation is seeking a Research Associate for our Bioanalytical Department. Candidates will be responsible for providing technical expertise in supporting preclinical studies of small and larger molecules conducted under GLP, ISO 17025, and various other regulatory guidelines. Research Associates must work closely with study directors, analytical services staff, and quality assurance to ensure all study aspects are conducted in per scientific and regulatory requirements. Excellent communication skills needed as this position works closely with other research associates and scientists. Individual must be highly organized to handle multiple projects on an ongoing basis.

Job Duties and Responsibilities

- Performing analysis and troubleshooting utilizing various analytical instruments, specifically HPLC and LC/MS/MS, including sample preparation and data interpretation.
- Supporting analytical phases of toxicology/pharmacology studies leading to product registration (FDA/ICH, ISO, and others), including dose verification, method development, method validation and sample analysis.
- Experience with methods of sample preparation of various biological samples, including solid and liquid samples, for analysis.
- Developing test procedures, associated validations and services for Pharma Chemistry.
- Review data and prepare results for reporting.
- Assist in managing inventory for all laboratory supplies.
- Assist Study Director and Quality Assurance in ensuring that all testing is conducted in accordance with appropriate protocols, SOPs and/or applicable regulatory guidelines.
- Meet project deadlines including the completion of technical work to standards.

Qualifications

- Candidates must have a minimum of Bachelor’s degree in Chemistry, with preferably 3-5 years of equivalent laboratory experience.
- Must have some knowledge of GMP/GLP regulations in an analytical laboratory setting.
- Experience with Analyst and Chemstation software preferred.
- Experience in interpretation of MS data required.
- Exceptional oral and written communication skills
- Ability to work in a high volume, fast paced environment.

This position is located in Bedford, MA.
